1. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The expression of "preferably" is considered as indefinite since it is not clear what scope is claimed.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3, 4, 14 and 15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either US 4,204,872 to Hayati et al. (see, for example, col. 4, lines 32-62 and col. 5, lines 21-30), US 3,894,572 to Moore, Jr. (see, for example, col. 2, lines 29-37 and col. 11, line 45 through col. 12, line 18), or US 3,616,840 to Dunlop (see, for example, col. 1, lines 59-75 and col. 3, lines 24-28).

4. Claims 2 and 10 insofar as definite are rejected under 35 U.S.C. 102(b) as being clearly anticipated by US 4,204,872 to Hayati et al.

5. Claim 9 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by US 3,894,572 to Moore, Jr.

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 5-8, 11-13 and 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over either US 4,204,872 to Hayati et al, US 3,894,572 to Moore, Jr., or US 3,616,840 to Dunlop.

Each of the prior art references substantially shows the invention as claimed except that they use other composition as gel-forming material instead of polymer. However, it would have been obvious for those of ordinary skill in the casting art to select an appropriate gel-forming agent among gel-forming materials for their investment molding process through routine experimentation. It would also have been obvious to select a proper amount and particle size for the particular type of gel-forming material for the specific investment molding process.

8. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

9. Claims 1-19 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-15 of copending Application No. 10/587,425. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed disclosure of the copending application discloses the invention as claimed.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
